## TEN FRAMES GAME

## Math: Counting

Print the ten frames pages and either slip into page protectors or laminate.

You will need some type of manipulative to use for counters: either colored chips, flat floral marbles, Unifix cubes, themed mini erasers, or themed table scatter.

## Materials:

- Printable
- Manipulatives (either colored chips, flat floral marbles, Unifix cubes, mini erasers, table scatter shapes)

Have children count the number of pets in the picture, then place the same amount of manipulatives on the ten frame below.

Either have them write the numeral in the square or use the included number cards to place in the square.

Number Cards:
Cut out the number cards to place in the squares on the mats or have children write the numerals in the blank squares on the mats with a dry erase marker.

How many pets are in the house? Place that amount of counters in the ten frame.
